Company Mission

To provide our clients with the most satisfying logistics experience in conveying and delivering their goods

Company Vision

To be an organised, controlled and technologically advanced national and cross-border transportation company which is client-focused, delivers a prompt, efficient service to all our clients, while upholding our core values of integrity, transparency, and honesty.

Company Background

In 2000, Lise van der Berg established a transport-broking business, TRADEVEST 041 (CC) in Nelspruit. The company's client base grew rapidly and soon thereafter acquired a fleet of trucks. A warehouse was added and a reliable service-oriented brand emerged in various sectors i.e. Agricultural, Fertilizer, Citrus, Construction, Cement, Steel, Sugar, Timber, Fresh & Frozen Produce, Wine, etc.

The company relocated to Somerset West/Strand, Western Cape Province, in 2015, where it established its head office. Through extensive marketing and networking TRADEVEST LOGISTICS is expanding and becoming a trusted supplier throughout the Southern African region.

Tradevest Logistics shows its ongoing commitment to professionalism and service excellence and in November 2015 it secured a three-year SOUTH AFRICAN BREWERIES (SAB) contract. This contract required the company to establish a depot in Polokwane and for this it opened a new branch. The operation requires depot to depot transfers, 24 hours a day. The SAB required the implementation of RTMS (ROAD TRANSPORT MANAGEMENT SYSTEM). We achieved accreditation.

RTMS certification means:

RTMS is an extensive transport managing tool, which enables a transport contractor to operate and manage the business in the most efficient, safety conscious, and controlled way possible. This system was designed in 2007 and adopted by the road freight industry. When it is implemented and accreditation is achieved, the customer can be sure of TOP-NOTCH control and reliability. All aspects of transport and the management thereof is covered in the RTMS manual. Each contractor must implement the practices described in this manual; and these practices must become part of its business operations. Various audits are performed to inspect operations and adherence to prescribed practices.

RTMS certification is awarded when ALL criteria are met and the external auditor is satisfied that everything functions according to the prescribed manual.

Broking Division

Customer service with sub-contractor's trucks. The broking division opened in April 2017. Operators are standing by to assist you with your enquiry – the availability of loads to be moved or trucks to be filled. Talk to us – we offer solutions, because WE KNOW HOW. ANY load from 1-34 pallets from anywhere to anywhere in the South Africa, Botswana, Swaziland and Mozambique. Call 021-035 0313 for a quotation.

In-house Training Offered

Drivers-in-house Training Programme: One assistant accompanies each driver
